

BIOMEDICAL SCIENCE

The Masters of Science in Biomedical Sciences is a one-year, full-time, non-thesis master's program designed for students who have an undergraduate science degree or have completed the course prerequisites for medical school. The program will be offered in blended mode; some courses are offered in-person and others online. Upon completion, students are well prepared to apply to medical, dental, veterinary, physician assistant, or physical therapy programs. Advanced coursework and additional professional development opportunities guide students towards achieving their goals.
